H PROJECT

Thanks to the collaboration with **Guidosimplex**, a specialized company in the design, production and installation of driving aids and transport systems for those people with disabilities, **DAZEROA300** is the first reality in Europe that gives disabled the chance to drive adapted racing and GT cars.

DAZEROA300 goal for 2019 is to start the collaboration with **Fisaps** as well (Italian Motorsport Federation for what concerns special driving licenses) and be able to offer its customers all those courses that this association already makes available to all disabled motorsport fanatics.

DRAZERDR300

DAZEROA300 wants to develop and increase the panorama of its activities in the automotive sector for disabled: driving courses, driving experience on the racetrack and racing driving licenses. The aim is to promote the development of the motorsport activity among disabled people, at the same time of the one conceived for all able-bodied individuals.

It is a certain fact that sport is a valid therapy for the reintegration and enhancement of one's own potential.

DAZEROA300 project is a special way of integration through sport, practiced by everyone, regardless their possibilities and attitudes, which involves both able-bodied participants and disabled ones, in the same racetrack activity.

Sport is an important tool for disabled in order to:

- allow them to get to know their body, placing it in a positive perspective to be valued and not to be seen as an obstacle;
- revolutionize one's point of view, providing new objectives and goals to be achieved;
- assign each one a role, a specific task in a collective context and by doing that, being able to succeed in breaking down those "walls" between them and able-bodied individuals.

We are all the same when talking about sports and on the racetrack we have a level playing field
