

ROAD TO FORMULA

F4 Racing Academy

ONE TEAM, ONE DREAM

Passion, competence and the right tools are the keys to success. But nothing would be possible without a well-experienced team by your side. Dazeroa300 offers its skills and tools to those who have decided to pursue a career in motorsport, marking the ideal racing line toward victory.

ABOUT US

Dazeroa300 is certified as *Centro Tecnico Federale Auto* by the Italian Federation *ACI Sport*. This means that all the training and courses are recognized as official ones by the Federation. Our courses are especially dedicated to those young drivers who want to improve their skills and enter in the world of motorsport as a professional. Always supported by our professional drivers and instructors, the trainees will improve not only their driving technique and behaviour on track, but also their psychological and physical status.

A TAILOR-MADE EXPERIENCE

Dazeroa300's *F4 Racing Academy* is a special one-to-one training program designed for young go-kart drivers who want to boost their career in motorsport and reach a higher licence level. The aim of this program is to offer them the right tools and skills to face all the challenges the world of motorsport will put in front of them, on and off the track.

The program includes theoretical sessions and a lot of practice, always supported by our professional drivers-instructors. All our instructors have a competitive background in the racing world and have been, or are currently competing, in national and international racing series.

TRAINING STEP BY STEP

STEP 0

Written and practical test, to understand the starting level of the trainee

STEP 1

Licence exam with ACI Sport Federal examiner

OUR CARS

BMW M3 E92

RADICAL SR3
Supersport

MITJET 2.0L

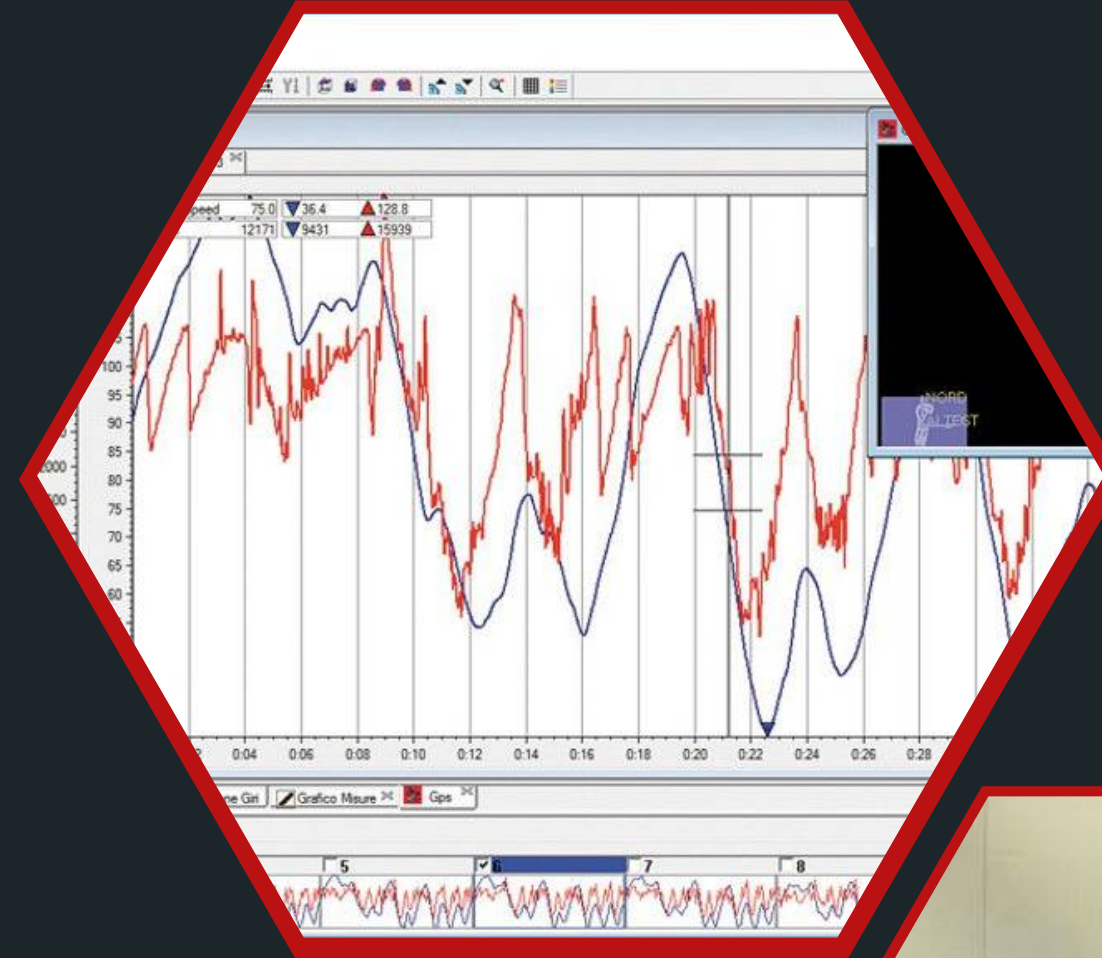

TATUUS
FORMULA 4

DATA ANALYSIS

Through the latest generation of AIM data acquisition systems, the trainees will have the opportunity to view, monitor and process all the data and video collected during the tests.

Thanks to this devices and the support of the instructor and the racing engineer, in the first part of the course the trainees will improve their driving technique, and, by the end of the training, they will be able to search for the right performance by modifying the car's set-up.

DRIVING SIMULATOR

We are proudly collaborating with AVEHIL, leaders in the sector of professional driving simulation, in order to provide our trainees the latest and most efficient technologies to improve themselves also off the track.

MENTAL ECONOMY TRAINING

Thanks to the partnership with Formula Medicine, sport medicine centre, we give our trainees the opportunity to participate in the *Mental Economy Training*® program.

The goal of this program is to teach our trainees how to optimize their brain function in order to increase their performance and reduce energy waste.

TECHNICAL EQUIPMENT

Thanks to the collaboration with Sabelt and Stilo, we are also able to offer our trainees all the racewear necessary to hit the track in total safety, in case of need. Tracksuits, gloves, helmets, balaclava, HANS® collar, everything strictly approved by the FIA.
